**Safety of goods** is one of our main goals, so we choose only the world leaders in the field of inspection services, examinations and tests for audits and certification of our business processes and production facilities.

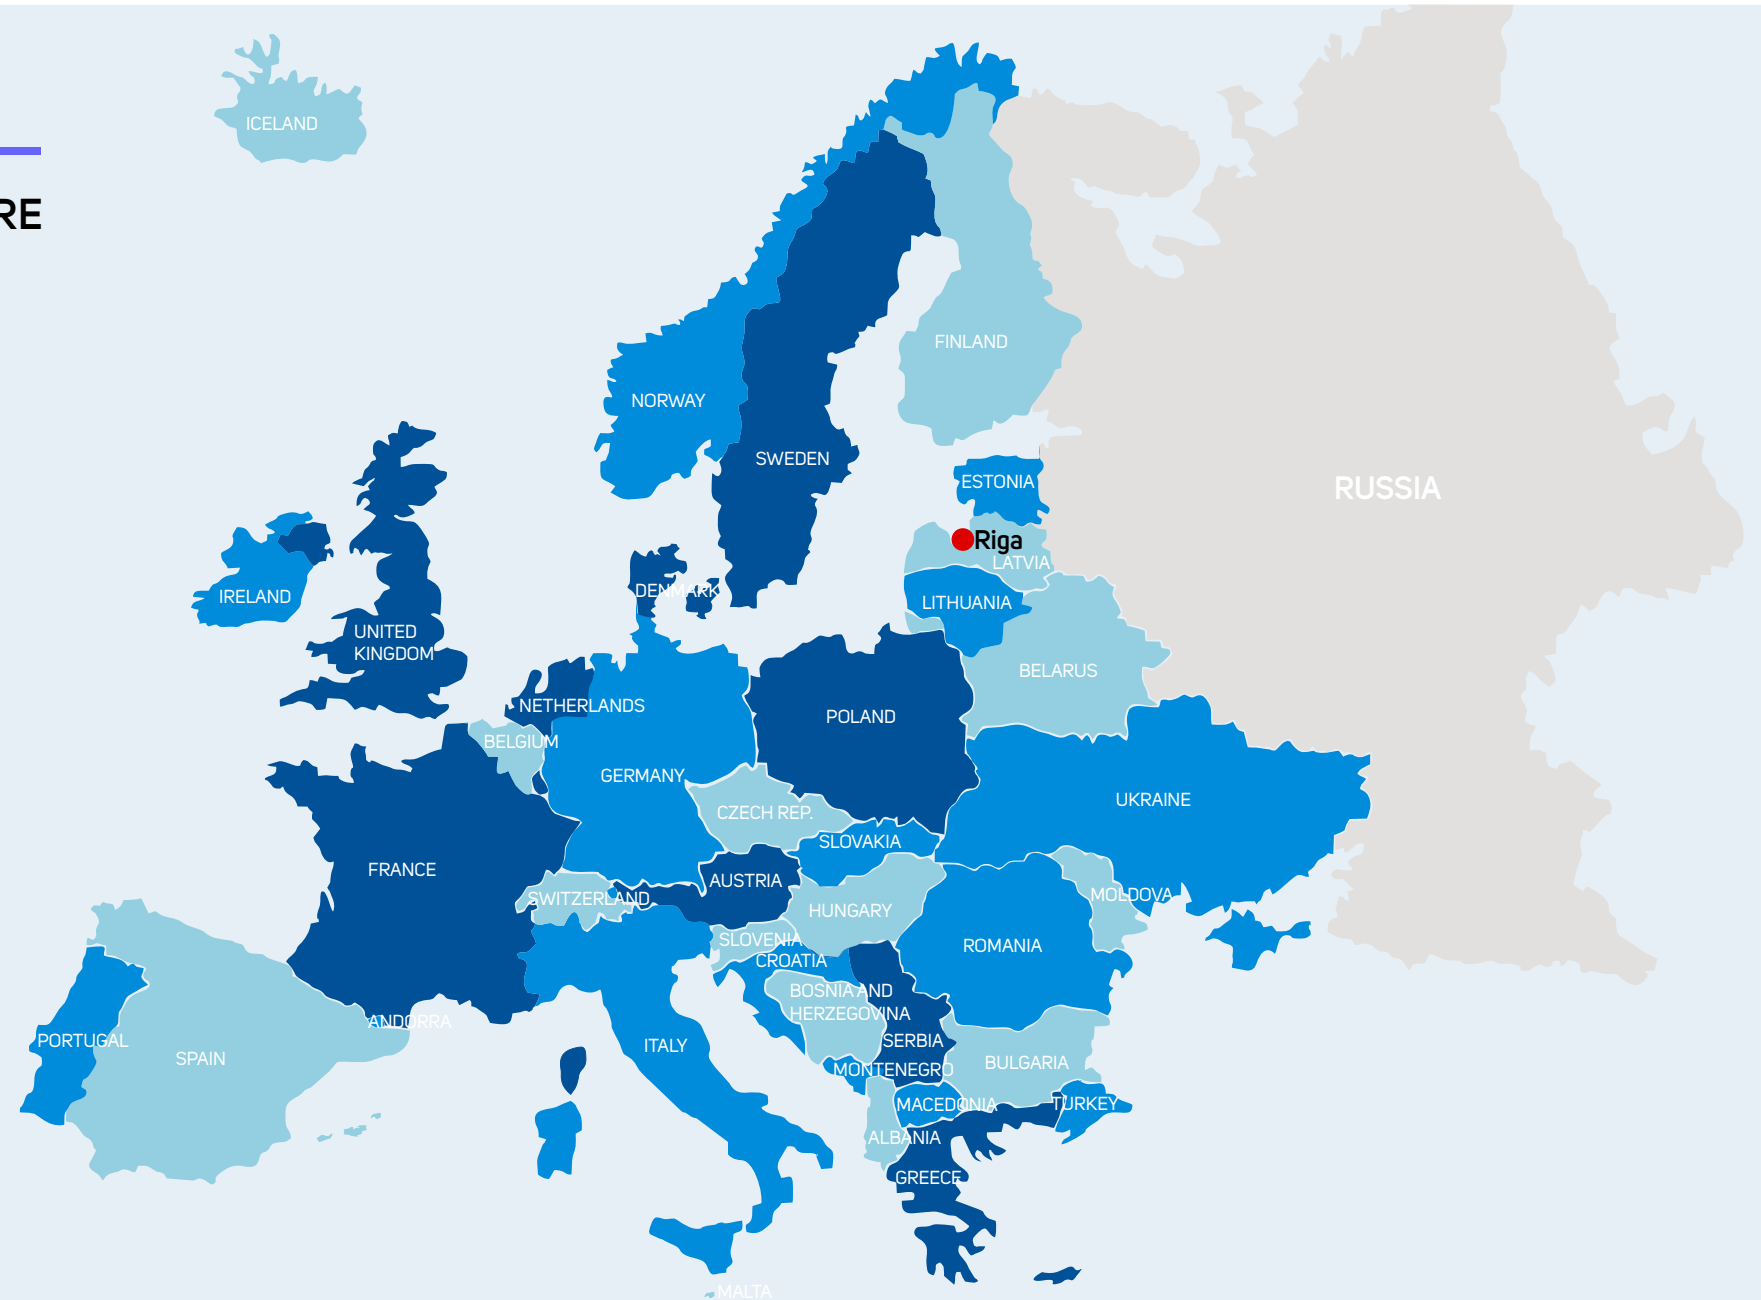

Patented products are extremely important in today's market, so all our products have **their own registered trademarks**

**The FSC certificate** is a symbol of responsible attitude of forestry companies towards natural resources and their care for forest conservation for future generations. We try to contribute to environmental protection and choose partners that supply raw materials made from responsibly managed forests.
